### ABOUT ME

Hello, I have been deeply interested in computers and technology since my childhood. When I started my studies in the Construction Technology department at university, I couldn't have predicted that my interest in computers and technology would eventually become both a profession and a deep-seated passion over the years. After graduating, my interest and passion for the software industry continued to grow. I started learning software development on my own, and this passion gradually became the focal point of my life. I began learning software development from scratch, and on the 27th day, I started working at a software company, opening a new chapter in my life. To further support my progress in the software world, I began studying Business Administration at Balıkesir University, aiming to acquire the ability to market my own software projects. Additionally, I started my university education in the Computer Programming department to enhance my technical knowledge related to software. I am driven by a dedicated commitment to improving my skills and a passion for continuous self-improvement. Best regards.

### WORK EXPERIENCE

#### Web Developer

**Trair Software Technologies** [ 01/11/2022 – 22/09/2023 ]

I've developed myself by working with various technologies: Next.js, Redux, Tailwind CSS, Bootstrap, React, JavaScript, Python, and Django View, among others. This allowed me to enhance user experience and strengthen my technical skills. These experiences have shaped me into a confident software professional. Moving forward, I'm eager to continue growing by learning new tools and techniques.

#### Web Developer

**Yosoft Software** [ 01/10/2021 – 01/02/2022 ]

**City:** Kocaeli

**Country:** Türkiye

I started my software career at a company where I began web development using JavaScript and React. This allowed me to create user-friendly interfaces and learn how to optimize code efficiently. I also had the opportunity to enhance my teamwork, communication, and continuous learning skills. However, in order to further develop myself, I decided to relocate to a city with a thriving software community, where I can be surrounded by fellow programmers and benefit from their knowledge. This step marked a significant move towards advancing my skills even further.

#### Web developer

**Freelance** [ 05/08/2021 – 25/09/2021 ]

I have developed websites, QR menus, and custom applications tailored to various client needs, yielding impressive outcomes. Throughout these processes, I harnessed cutting-edge technologies.

I designed dynamic and interactive web applications using technologies like JavaScript, React, and Next.js. I embraced UI frameworks such as Bootstrap and Tailwind to craft user-friendly interfaces.

I have developed websites, QR menus, and custom applications tailored to various client needs, yielding impressive outcomes. Throughout these processes, I harnessed cutting-edge technologies.

I designed dynamic and interactive web applications using technologies like JavaScript, React, and Next.js. I embraced UI frameworks such as Bootstrap and Tailwind to craft user-friendly interfaces.

By delivering bespoke solutions aligned with client requisites, I assisted in streamlining their business processes. I augmented customer engagement for restaurant and café establishments by introducing digital experiences through QR menus.

I placed significant emphasis on continuous research and learning to surmount technical challenges and cultivate innovative approaches.

## LANGUAGE SKILLS

---

Mother tongue(s): **Turkish**

Other language(s):

#### English

**LISTENING B2 READING B2 WRITING B2**

**SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2**

#### German

**LISTENING A1 READING A1 WRITING A1**

**SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1**

#### Spanish

**LISTENING A1 READING A1 WRITING A1**

**SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1**

*Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user*

## DIGITAL SKILLS

---

### Frontend

HTML / CSS / Bootstrap / TailwindCSS / Javascript / Next / React / Typescript / Python, Django View

## General

Git, Bitbucket / Docker / MySQL / PostgreSQL / Node.js

## PROJECTS

---

### Misafir Ol

Write here the description...I worked alongside my company to create a free platform that could be utilized for accommodation purposes by earthquake survivors. The primary objective of this project was to provide support to earthquake survivors and offer them temporary shelter options for those who had lost their homes. It's important to emphasize that this project was driven by altruistic motives and did not have any profit-oriented goals.

Our project acted as a platform that connected homeowners willing to help accommodate earthquake survivors with those in need. Homeowners could create listings offering their homes to earthquake survivors at no cost. Conversely, survivors who had lost their homes could search for suitable listings and apply to them, establishing communication with potential hosts.

The fundamental aim of this project was to foster a sense of mutual assistance and solidarity among earthquake survivors during their challenging times. Additionally, we aimed to raise awareness across society about supporting earthquake survivors. Consequently, our project garnered significant attention through news outlets and various social media platforms.

We actively participated in this project, sharing content that explained the project's purpose and functioning through news channels and social media platforms. Our goal was to extend the project's reach to diverse segments of society and enhance its visibility.

In conclusion, with the purpose of addressing the accommodation needs of earthquake survivors and nurturing a spirit of mutual support, we established this free platform. It effectively bridged the gap between individuals willing to offer their homes and those in need, serving as a conduit for people's willingness to open their homes and the needs of those seeking shelter.

## HOBBIES AND INTERESTS

---

### Hobbies

Among my hobbies, there are a few interests that stand out. Writing code is one of my greatest passions; I get excited about learning new software technologies. Playing games is also a source of relaxation for me; I can immerse myself in virtual worlds and test my skills.

Staying physically active is also important to me, whether through sports or individual workouts. Discussing these topics with others is valuable to me because it not only increases my knowledge but also helps me build connections.

In summary, my hobbies revolve around coding, playing games, staying active, and engaging in meaningful conversations with individuals who share similar interests.

## CERTIFICATES
